Excited to grow your career?

- We value our talented employees, and whenever possible strive to help one of our associates grow professionally before recruiting new talent to our open positions. If you think the open position you see is right for you, we encourage you to apply!

-

Our people make all the difference in our success.

This digital tools role incorporates a variety of diverse digital technologies into an ever-changing workforce. This role will be responsible for implementing these technologies into existing infrastructure to help to optimize and industrialize digital tools across our organization. As a global bank, this role is positioned in a manner where individuals are connected to a broad network of uniquely talented partners across the world.

The Global Digital Team is part of the Product Control organization and is responsible for managing various initiatives and driving transformation. The vision of the Digital Team is to facilitate Global Product Control to be an exceptional team that embraces innovation and inclusivity. The team seeks to be a catalyst for change and drive global end-to-end process transformation in accordance with the roles and responsibilities of Product Control. As an organization, Product Control is responsible for ensuring the completeness, accuracy, and integrity of the bank's books and records in coordination with the Finance team.

This Digital Team supports our organization's innovation and transformation efforts. This team will enable a consistent model for Digital delivery to drive and support the design and implementation of digital use-cases. The team will also provide power user advisory and support for digital enablement, the identification of digital tools and use-case solutions and drive efforts supporting the Digital Upskilling of the population of Product Controllers globally.

Responsibilities

The Digital Transformation Analyst will be part of the Digital Team and will help in defining the digital roadmap, driving change and enabling the implementation of digital solutions. Key responsibilities include;

- Working with Digital Use-Case owners to design and implement specific solutions and deploy them on a country, regional or global basis.
- Working with the various functions within Finance and GFTS (Global Functions Technology Services) to ensure that the digital strategy is optimal given current and emerging digital realities and opportunities.
- Tracking cross-functional activities and ensuring consistency in the processes and methodologies that are deployed.
- Acting as a key member of the team defining and building out training programs for Power Users.
- Supporting the various Product Control teams globally to improve their understanding of the impact of emerging technologies and industry trends and provide recommendations and solutions for how to adopt new standards and requirements.

Education:

Bachelor's/University degree in Computer/Data Science or equivalent is preferred

Qualifications

The ideal candidate will have educational experience in deploying digital tools & solutions with a comprehensive understanding of working on transformation projects. Additional qualifications include;

- Highly skilled in digital tools and capabilities (i.e. KNIME, PYTHON, PowerBI, Tableau, etc.)
- Ability to manage multiple tasks and work effectively in a rapidly changing environment
- Strong business analysis and design skills
- Strong communication skills in order to guide and influence others and interact effectively with business and technical teams
- Experience and ability to manage competing priorities in a complex and dynamic environment
- Excellent written and spoken English language skills
- +/- 5 years of experience in Financial Industry desired

Grade : C12
