

Samples of Formatted References for Authors of Journal Articles

The [International Committee of Medical Journal Editors \(ICMJE\)](#) offers guidance to authors in its publication [Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals \(ICMJE Recommendations\)](#), which was formerly the Uniform Requirements for Manuscripts. The recommended style for references is based on the National Information Standards Organization [NISO Z39.29-2005 \(R2010\) Bibliographic References](#) as adapted by the National Library of Medicine for its databases. Details, including fuller citations and explanations, are in [Citing Medicine](#). (Note [Appendix F](#) which covers how citations in MEDLINE/PubMed differ from the advice in Citing Medicine.) For datasets (Item 43 below) and software on the Internet (Item 44 below), simplified formats are also shown.
